Technician Notes: Invoice and Pricing Notes:

If parts/materials are not in your truck stock, please make sure to add the standard .5 hour or use this section to add the round trip actual travel hours to your service ticket. Use the code above - but write on invoice the actual repair description.

If you need labor hours or repair materials greater than the available tasking items, simply use any two or more to obtain total hours or total materials needed to complete work.

The miscellaneous parts and material costs needed are listed as PM0000 series and represent vendor supplier costs in dollars.

Always round up to the next logical price code. Example: For \$46 dollars worth of parts you would select PM0050 since \$46 is greater than the midway point between \$40 and \$50. For \$42 dollars worth of parts you would select PM0040 since \$42 is lower than the midway point between \$40 and \$50.

For parts needed greater than \$400 use 5425-0000 code and multiply vendor price by 1.4 to derive sell price.

Remember, the only thing worse than misspelled words and poor handwriting is no words and no handwriting.

Always mention how to receive a 15% discount off today's repairs
